

Lambrecht Spijkerboer

Dutch educator, consulting schools (teachers and schoolleaders) improving education, especially in mathematics

Kalina Kijewska

Docente di matematica all'Istituto IIS Sella Aalto Lagrange di Torino

Comunicazione

How to make students (more) active in learning?.

In this talk we will focus on topics like:

- Moving from teacher centred education to student centred education
- Scaffolding
- Developing self efficacy

With many examples we will try to answer questions like:

- How does motivation works?
- How to organize your lesson to make individual accountability useful?
- What are suitable tasks to make learning the topic interesting enough?

During this talk, there will be Italian slides available. You're invited to ask questions (English or Italian) afterwards.
