

Lambrecht Spijkerboer

Dutch educator, consulting schools (teachers and schoolleaders) improving education, especially in mathematics

Kalina Kijewska

Docente di matematica all'Istituto IIS Sella Aalto Lagrange di Torino

### Laboratorio 1

#### **Different ways of working**

During this workshop we will work on how to organize your lessons-to actively involve students with different ways of working. Among others *Individual accountability* and *Positive dependency of each other* are the key-concepts of cooperative learning. You-will be invited to figure out how this works for you, with your subject matters and with your students of different age.

The workshop will have an English presentation, but partly - while working in small groups - it is possible to use Italian language.
